To whom it may concern,

The manuscript entitled “Performance of Wheat Varieties (*Triticum aestivum* L.) under Conservation Tillage Practices in Organic Agriculture” by Dimitrios Bilalis *et al.* has been checked for linguistic accuracy by an experienced native English speaker. Please note that the spelling and grammar used throughout are for British English.

Among the various services we provide, we believe our manuscript preparation service is of high standard and always appreciate feedback on the quality of our work.

Yours faithfully

Susan Coward
